## Your Meat Supply

Do you want a nice, tender ROAST? We carry  
only the choicest grades of Beef, Pork, Veal and  
Lamb. Our stock is always fresh, and you can get  
as good choice as you will find in any town. We  
also have a good stock of Smoked Meats and Fish,  
Sausage, Bologna, Lard, Etc.

FRESH FISH ON FRIDAYS.

WE CAN SUPPLY YOU GOOD SPRING CHICKEN  
FOR YOUR SUNDAY DINNER

## Youngstown & Chinook Meat Markets

## Fill Your Coal Bins Now

We suggest ordering your COAL for the winter now.  
Due to the large crop this year there is a probability of  
car shortage which might work hardship on the im-  
portation of coal. Avoid being caught without coal in  
case of a sudden cold snap by ordering NOW. We  
are again selling the SCRANTON, Drumbeller lower  
seam coal. Place your orders for STORM SASH  
with us now and be prepared for the cold weather.

DOROTHY GISH, in

## "Madam Pompadour"

She ruled a nation, yet could not rule her own heart.

School Hall, Thursday, Dec. 1

## LOCAL ITEMS

Ed. Deman was a Calgary visitor last week.

Levi Vennard and family moved on to the Whelan place for the winter.

Mr. and Mrs. Hector McInnes moved on to the Peterson farm for the winter.

Harold Stewart left last week for Calgary, where he will re-enter Technical College.

Mr. Aylesworth, B.A., school inspector, of Oyen, was a visitor at the Chinook school today.

Mr. Richard Stewart made a short trip to Calgary last week to have an optical examination.

Wm. Cozart, of Calgary a former resident of Ceresal, was in Chinook last week on business.

A dance will be held in the school hall tomorrow, Friday night, after Chautauqua program.

Miss Helen Lensgraf, who has been visiting at Chillmark for the past two weeks, returned home this week.

Duncan Roberts left Sunday for Edmonton, where he will take a course in telegraphy at the Alberta college.

Ole Ackron and Fred Elm returned from Hanna last week and will resume threshing north of town in a few days.

The Heathdale Syndicate, who have been threshing on the farm of J. L. Ferguson, stopped operations there last Friday.

Miss M. Sinclair, representing Chautauqua, the four day session of which started in Chinook this afternoon, was a business visitor here Tuesday.

Mr. Andrew Aitken, who has been assisting in harvesting operations at his farm during the fall, left Saturday morning for his home in Vancouver.

Mrs. R. Sayers and little daughter, of the Laughlin district, who was called to Crossfield by the illness and death of her mother, returned home on Saturday.

The school van from the west, while driving the children to school on Wednesday morning, was accidentally upset. Some of the scholars were bruised and shaken up.

Peter Johnston, son of Mrs. Johnston who has been keeping house for Mr. Turner during the summer, was taken to Calgary on Tuesday morning for an operation for appendicitis. The lad was in a critical condition.

Mr. Jas. Rennie was a visitor in Calgary for a few days the first of the week. We understand Jim has not been enjoying his food as well as he thought he should, so he decided to invest in a set of false teeth, hence this trip to the city.

Don't miss the Faubel Entertainers at Chautauqua Saturday night. Clever impersonations, exceptional ventriloquism and pleasing piano/accordion and violin music. You will laugh more than you have laughed in many months.

The Acadia West Woman's Institute Constituency Convention, which was to have been held in Chinook, will be held in the W.I. Clubroom at Ceresal instead on Tuesday, November 29th, at 1 p.m. All Institute members and anyone interested in the work are invited to attend.

## A RIGHT MOVEMENT

A petition has been circulated around town this week, asking for the opening of a banking business at least once a week in Chinook.

We have in this town a good bank building and a good business can be done in this community by such an institution. It is well known that for some years it was a costly proposition to keep a banking staff in Chinook, but now, with the good crop we have had this year and the large volume of business being done here, we should have a more convenient system of doing banking business in our town than we have at present. On account of the condition of the roads in winter, it is quite an hardship to the business men to have to drive even six miles to do their banking.

With the re-opening of the branch here, even for once a week, which is all that is asked at present, the merchants of Chinook will be in a better position to do business and will overcome a great inconvenience. It is reported that the manager of the Acadia Hotel has offered a room free for the purpose of transacting banking business if the bank management does not feel warranted in opening their own building.

It is hoped the petition will have the influence of deciding the re-opening of the bank in Chinook

## M.D. Sounding Creek No. 273

Minutes of the council meeting for the Municipal District of Sounding Creek No. 273, held on November 19th, 1927.

Meeting of the council was called to order at 5 p.m., with Councillors Cameron, Cowin, Goodband, Lawrence and Synnuck present.

Minutes of the previous meeting were read and adopted on motion of Mr. Lawrence.

Moved by Mr. Goodband, that we rent the S.E. 1/4 of Sec. 15-30-8 & 4 to Mr. F. Farnow for one year at a rental of \$30.00.

Cheques issued by the Reeve and Secretary were authorized.

The financial statement as presented by the secretary-treasurer was approved.

By Law No. 32, extending the time for the prohibition of animals running at large to November 30th, 1927, was passed.

The secretary was instructed to notify all pound-keepers to this effect.

Bills totaling \$384.55 were ordered paid.

## Mrs. Louise McIntyre's Lecture "How's Your Health?"

The supreme purpose of this lecture by Mrs. Louise L. McIntyre—distinguished health expert and author—is to instruct people in the science of knowing how to keep well. All scientific terms, data and all fads will be eliminated, and with delightful humor and practical suggestions, Mrs. McIntyre will emphasize the great importance of good health and how to preserve it.

This lecture will be given at the Chautauqua on Saturday afternoon. Eminent doctors state this lecture alone is worth many times the price of a season's ticket.

The Faubel Entertainers proved exceptionally popular when they played last summer on the most important circuit in the world, the Redpath DeLuxe Seven Day Circuit, which runs through the largest cities of the New England states.

"is good tea"

RED ROSE ORANGE PEKOE is extra good.

## Winter Traffic

Snow on the city streets should mean to all automobile drivers at least one thing, says a daily newspaper,—a driving speed of at least ten miles an hour less than summer speed. And this word of advice to city motorists may well be passed on to motorists on country roads.

Snow is a tricky surface. It provides good traction on paved streets and hard roads when a car is forging ahead, but no traction at all when the brakes are suddenly applied. In other words, a car can be driven easily on it but can be stopped only with difficulty.

It is disconcerting to drive up to a street or road intersection at what in the summer months would be a moderate speed, and finding need of applying the brakes, feel the car sliding helplessly upward, or suddenly skidding to the side. It is disconcerting always, and it is frequently dangerous as well.

Experienced and careful drivers have various means of checking this sliding and swaying, but they know there is only one sure method, one real safety device,—to drive slowly, and particularly so when near road intersections, curves, culverts, bridges, passing other cars, etc. Only so can a car on slippery roads be kept sufficiently under control for safety.

PeDESTrians, too, should take warning. The practice of standing on the road just a foot or so away while a motor passes is dangerous enough on dry roads. It is doubly dangerous after the snow comes. If the driver has need to apply his brakes suddenly the car will come out of ten to twenty to the left or the right, and the pedestrian standing too close is likely to be side-swiped with unpleasant results.

Winter conditions should, in brief, intensify care in driving and walking. There is much greater liability to accident with snow on the ground.

Cold weather brings another danger which is not so much in evidence in summer. In cold weather motorists are tempted to start up their engines and allow them to run for a time to warm up within the closed doors of the garage. As a natural result the garage fills up with the deadly monoxide gas from the exhaust with all the possibilities for tragedy which such a condition brings about.

Another factor which necessitates greater care in winter driving is created by the fact that touring cars have all their curtains up while the windows of closed cars are kept shut. It is not possible, therefore, to signal with the same ease and effectiveness to other cars to the rear regarding the turn a driver may intend to make. In the winter, therefore, greater attention should be paid to the rear than is necessary during the summer months if accidents are to be avoided.

## British Money For Canada

153 Carloads Of Eggs Shipped East From B.C. Last Year

Prof. E. A. Lloyd, of the Poultry Department of the University of British Columbia testified before the Board of Railway Commissioners that there were over 2,000,000 hens in the province and that 153 carloads of eggs had been shipped east from British Columbia last year. He added that hens in this province laid more eggs than in any other province, and that egg production here was fully 100 per cent. greater than in the east.

Mustard plasters naturally come under the head of smart-articles.

## Are You Nervous? Sleepless?

St. Catharines, Ont.—"I was in such a nervous and rundown state of health that I could not get to sleep. I could get around to do my work. I could not sleep and the noise or excitement would completely upset me and throw me into a nervous spell. I was advised to take Dr. Pierce's Favorite Prescription and I was soon well and strong and have never had another spell of nervousness since."

"I always keep a bottle of Dr. Pierce's Pleasant Pellets in my medicine chest; they are the only medicine I have ever taken that would regulate the liver and relieve constipation without causing distress."—Mrs. Ada Taylor, 46 Wiley St. Send 10c to Dr. Pierce's Laboratory in Bridgeport, Ont., if you desire a trial pkg. Favorite Prescription tablets.

## DYEING AND TINTING

are so easy and perfect IF you use the same kind of Dyes. Professional Dyers use Dye-ol. They are put up in highly concentrated, finely powdered, soluble form. No work to dissolve them. Never any shoving, scraping or crumbling them up. They are—

# Ancient Shell Fish Heaps On The Pacific Coast Date Back To Before Columbus

What is a kitchen midden, references to which have been in newspaper dispatches recently? It begins as if it might possibly be a particularly efficient form of apron or overalls, or possibly even a labor saving device or electrical fixture. It is none of these things. A kitchen midden, says the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, is a prehistoric refuse heap, made up chiefly of shells and bones, much akin to our modern garbage dumps. They are delightful hunting grounds for archaeologists seeking evidence on the living customs of other days and no doubt the scientists of another civilization will be examining with eagerness the queer shaped bottles, tins and bits of a bygone (1927) Canadian city garbage dump.

The excavation of the kitchen midden being carried on near Seal Cove to the north end of Prince Rupert, B.C., is one of the most interesting pieces of archaeological work attempted in Canada in some years. According to Harlan I. Smith, Dominion Archaeologist, there must have been a considerable settlement of Indians at Prince Rupert before the time of Columbus, as is plainly evident from the fact that a huge red cedar stump stood on top of the refuse heap or kitchen midden as the debris from Indian occupation is known. A preliminary count shows over 225 rings of annual growth without including heart rot or closely crowded outer rings. How long the cedar fell is not known but it is evident that the heap of debris must have accumulated before the year 1660. It was probably many years in the making and perhaps many more years elapsed before the cedar took root.

Quite a number of kitchen middens have been located along the British Columbia coast, four of which lie within as many miles of Prince Rupert while others are found within the city limits of Vancouver and Victoria. The white man's cities have arisen on the site of the ancient red man's habitations. Whereas the European migrant was attracted primarily to anchorage for his vessels, the Indian was concerned with his food supply and made his abode at the mouth of freshwater streams near ocean beaches where shell fish are abundant.

The kitchen middens were built up of refuse from the aboriginal villages, refuse which consists almost entirely of clam, mussel and other shells, with here and there a human skeleton. Typical heaps measure several hundred yards long by five or six feet high; a few extend for miles, and several attain a height of more than nine feet. What enormous quantities of clams and other shell fish these early inhabitants of Canada must have eaten and for what centuries has the coast line been productive of these nutritious foods? Perhaps there is no other food so easily won from Mother Earth. The white man took up the digging where the Indian left off and the same sands which provided succor for the aborigine are still highly productive. It is just recently, however, that the full value of these shell fish foods has been appreciated and the clams, quahaugs (hard clams), crabs and shrimps are esteemed items of food which are recognized to be rich in protein, vitamins and mineral salts which fortify the human system against disease.

The Dominion Archaeologist is doing much to discover the history of the early dwellers in Canada, their habits, culture and mode of living. Not the least interesting is his investigations of these old shell heaps, and he reports that the present work furnishes the best opportunity for real exploration by excavation he has had since 1914, particularly because the old cedar tree with its annual rings gives fairly definite information as to the antiquity of these evidences of coastal habitation by the aborigines.

**A Queer Occupation**  
As a worm farmer, Richard Rowden of New York makes a good income. His worms are bought by student zoologists who use them for dissection experiments. Rowden gets to an open field at night with a flashlight and catches a pallet of angle worms by selling them at the rate of 12 for 20 cents, he makes a good day's wages.

Hewitt—"Who is that man?"  
Jovitt—"He is our village cut-up."  
Hewitt—"He doesn't look funny."  
Jovitt—"He isn't funny at all; he is the only squire in the place."

When vegetables get wilted, try putting the juice of a lemon in the cold water you freshen them in.

W. N. U. 1708

## B.C. Pedigreed Poultry

Another Order Received From Japanese Government By Poultry Breeders' Association

So well satisfied is the Japanese government with the pedigree poultry supplied by the R.O.P. Poultry Breeders' Association of British Columbia that its agent on this continent has called Secretary E. A. Lloyd another order, which will run into several hundred dollars. It is for six White Leghorn cockerels and twenty-four pullets of the same breed, all to be the progeny of hens with official records of 300 eggs or over.

F. A. Sanoano, of Greenwich, Connecticut, recently purchased from the poultry department of the University of British Columbia, a White Leghorn hen for \$500. This expensive hen, registered as F319, is, however, a money maker when it comes to egg laying. Last year she laid 335 eggs in 365 days. She was one of the attractions at the World's Poultry Congress, held in Ottawa this summer. The world's champion egg layer, "Maidie," as she is popularly known, is also a member of the University of British Columbia flock. Her record is 352 eggs in 365 days.

## Favorable Trade Balance

U.S. Tourist Trade Here Greater Than Canadian Trade In Status

In one important phase of international trade between Canada and the United States, the balance of trade is in Canada's favor. This is the tourist traffic. Official figures issued at Ottawa show that the value of the tourist traffic to Canada in 1925, was \$190,463,000, having grown to that figure from \$82,734,000 in 1920. Of the total, more than half, or \$105,000,000, is credited to the automobile tourist traffic. It is certain that the figures for 1927 will be much greater.

According to official statistics, published at Washington, Canadian tourists in the United States last year spent \$27,000,000. So there is a favorable Canadian "balance of trade" amounting to \$165,463,000, which helps to redress the adverse trade balance in the exchange of commodities.

**Winnipeg Newspaper Union**  
Fashion  
A Smart Flared Skirt  
Every important couturier features the flared skirt this season, and the one pictured here is suitable for wearing with an over-bustle or sweater. The attached under-bodice has darts at each side of the front, and the top may be made shaped, or straight with shoulder straps. No. 1679 is for misses and ladies, and is in sizes 36, 38 years; 38, 40, 42 and 44 inches bust. Size 38 requires 1 1/2 yards 39-inch, or 1 1/4 yards 44-inch material for the skirt, and 1 1/2 yards 36-inch material for shaped top, or 1 yard for straight top. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

## Saskatchewan Corn Growers

P. C. Colquhoun is Elected Head of Organization

P. C. Colquhoun, Maple Creek, the new corn king, was unanimously elected president of the Saskatchewan Corn Growers' Association at the annual meeting, when the fifth annual corn show was brought to a close at Maple Creek. It was decided to hold the 1928 corn show in Weyburn, Wednesday and Thursday of the third week in November. Invitations were received from Regina and Moose Jaw.

Other officers elected at the meeting were:  
First vice-president, G. D. Mathews, Indian Head; second vice-president, August Peterson, Weyburn.

Executive directors, B. E. Sen, Ben Harrison, Ed. Meredith, A. Monteith, and H. Thacker, all of Weyburn.

Directors: R. P. Robbins, Shamavon; George Spence, Regina; J. G. Taggart, Swift Current; E. Silbert, Piapot; Prof. Manley Champin, University of Saskatchewan; M. P. Tullis, Regina; J. G. Rayner, University of Saskatchewan; T. A. Torgeson, Estevan; J. M. Rodgers, Gull Lake; Chas. Marks, Midsay; G. H. Hoffman, Maple Creek; E. Waddington, Regina; Dr. Dason, Maple Creek; Dr. S. E. Clarke, Swift Current; J. C. Noble, Regina; P. P. Towell, Saltcoats; A. Cloughas, Estevan.

Preliminary steps towards the organization of the seed corn industry in Saskatchewan on a commercial basis with the establishment of a drying plant were taken at the meeting.

## Aviation In Britain

Great Increase Is Reported In Passengers For Cross-Channel Service

Between December, 1924, and July, 1927, planes of the British Imperial Airways flew 2,000,000 miles and carried 35,500 passengers without a fatality. According to reports, cross-channel flying is becoming more popular. In June this year, 2,400 passengers were carried as compared with 2,098 for the same month last season. The air union reported 1,060 passengers for the month this year as against 852 during the period last year. Between fifty and sixty per cent. of the passengers were women, the report stated.

## C.P.R. Plans Two New Musical Festivals

Scene during the Piping Contest—Banff Springs Hotel in the background.

Inset—Harold E. Key, appointed musical director of the C.P.R.

every European race and on account of that June has been selected as the most appropriate time for this gathering. The other Festival will be devoted to Sea music and will take place at Vancouver in the early fall.

Vancouver is a world port notable for the variety of its seacraft, with many old seamen familiar with sea chanteys. Other Festivals at other suitable points are also being planned by the Canadian Pacific, which has appointed Harold Eustace Key, conductor of the Mendelssohn Choir of Montreal, as Musical Director of these Festivals. Mr. Key will also have supervision of music at Canadian Pacific Hotels.

Mr. Key has made a reputation in Canada as conductor, composer, lecturer and organist, and is an authority on choral music and singing. Educated at Follington College, London, the City of London School, and the Guildhall School of Music, he came to Canada in 1904. At the outbreak of the war, he enlisted at Montreal, and served in France with the 47th Canadian (British Columbia) Battalion. He was wounded at Drocourt, and returned to Canada in 1919. Since 1920 he has been organist of St. Ann's Church, Montreal. In 1923, Mr. Key founded the Mendelssohn Choir and brought it to the highest state of efficiency.

## Bar-U Ranch Sold

Valuable Property Has Been Purchased By P. Burns

The famous Bar-U ranch, one of the most prominent ranching institutions in the west, has changed hands. Hon. A. J. McLean, executor of the George Lane estate, negotiated the sale with P. Burns, of Calgary, and the approximate amount involved will be in the neighborhood of \$750,000. The head quarters of the ranch are at Poldako, west of High River, and near the location of the holdings of His Royal Highness, the Prince of Wales.

The property includes 26,000 acres of deeded land and between 55,000 and 60,000 acres of leased land, according to Mr. Burns. The actual count of the stock has not been conducted but it has been estimated that there are about 6,000 head of cattle and 500 head of horses.

When interviewed by the Calgary Herald, Mr. Burns did not reveal his intention with regard to the disposal of the land and he gave no confirmation to the rumor that some of it would be sold to prominent Englishmen who are apparently eager to acquire holdings in Alberta in the vicinity of the E.P. ranch.

## Big Shipment Of Foxes

Consignment Valued At Half A Million Forwarded To Norway

The biggest shipment of live foxes to leave North America for the European market since the industry has been developed, was made, when a consignment of 1,000 hooded for Norway, left Charlottetown, P.E.I. for Halifax, where they will be forwarded on the steamer Stavangerfjord. These animals are valued at from \$500 to \$1,500 a pair, and the entire shipment is valued at approximately a half million dollars. A large party of Norwegian buyers have been in Prince Edward Island for some time, and this big movement presents the result of their efforts up to date.

## One Of Oldest Writs

The writ of habeas corpus, meaning literally that "you have the body," is one of the oldest writs of common law. Its purpose is to compel the production before the court of a person claimed to be wrongfully held in custody to determine why he is detained.

# Report Russia Will Participate In Peace Parley Is Welcome News To Other Nations

## Good Feed For Lambs

Sunflower Silage Given Test At Scott Experimental Station

In districts such as north-western Saskatchewan, where, on the Dominion Experimental Station, corn has never been a dependable crop even for silage, sunflowers constitute the bulk of the silage used.

Tests made at the Scott station in comparing sunflower silage with mixed turnips have repeatedly shown silage to be superior for lambs on a grain ration and cut straw. If turnips were equal to silage in feeding value, the crop would not become generally used on account of the extra labor required. From the cost of gains in the check lot, and the extra gains produced by feeding silage, it has been calculated from an average of four tests that when cut straw is the only other roughage, sunflower silage has a value of \$8.99 per ton for feeder lambs.

During the winter of 1926-27, a test was made to determine the value of sunflower silage for feeder lambs when low grade western dry grass hay was used to replace some of the straw. In this case the silage gave a return value of only \$2.45 per ton. One test is not sufficient to draw final conclusions, but from the results to date it would appear that the lower the quality of the main roughage, the higher will be the value of the sunflower silage.

## Minerals In Swine Feed

Appreciable Gain Is Shown When Mineral Mixture Is Used

The use of mineral mixture added to the usual winter rations for swine was shown to be worth while in a test carried out at the Rosthern, Saskatchewan, Experimental Station. Two pens of 5 Tanworth Yorkshire cross-bred pigs each were used in the test. Each lot received the same care and the same basic ration, which consisted of equal parts of shorts, oat crop and barley crop. The meal was fed dry to both lots twice daily. One lot received no mineral ingredients while for the other lot there was added to the feed about 2 pounds daily of a mineral mixture made up of 150 pounds of coal dust, 10 pounds of slacked lime, 10 pounds of bone meal, 8 pounds of salt and 1 pound of sulphur. The test was begun on November 25 and when it was completed on March 2, the pigs receiving the mineral mixture weighed an average of 212 pounds per pig while those receiving no mixture weighed 196 pounds each. The pigs receiving the mineral also had a more thrifty appearance than the others.

## Copper Carbonate Dust

For Smut Control

May Be Applied In Winter On Wheat Stored For Spring Seeding

Results of tests made at the Lacombe, Alberta, Experimental Station show that copper carbonate dust is to be preferred over formalin for the control of wheat smut. It effectively destroys the spores, and at the same time does not cause injury to the germination of the dusted seed. Another important advantage of copper carbonate dust is that it may be applied in the winter and the treated seed stored until sowing time. Two ounces of copper carbonate is used to each bushel of grain. A mixing machine of some kind is necessary as the dust cannot be applied by simply shovelling it and the seed together. Covered smut in hullless oats is also successfully controlled by copper carbonate, but formalin should be used to eliminate smut in common oats. It must not be forgotten that copper carbonate is poisonous, therefore breathing the dust should be avoided when the seed is being treated.

## Much Like A Cafeteria

A "serve yourself" policy of penalties for traffic violations, in which courts are eliminated for all except major infractions of the law, has been initiated at Los Angeles. Under the automatic system of fines, offenders are given a tag when apprehended on the reverse side of which is a schedule of fines for each offence.

Customer: "How much are your \$4.00 shoes?"  
Clerk: "Two dollars a foot."

No real hustler, would give two cents for the things that come to those who wait.

Some lawyers receive a larger fee for keeping quiet than others do for talking.

## The strongest glimmering of common sense that has come out of Russia for a long time is contained in the message from Moscow that the Soviet Government will participate in the preliminary discussions to a disarmament conference under the auspices of the League of Nations.

Since the end of the world war Russia has kept more men under arms than any other nation.

There were several reasons for this, but the principal reason was that the Soviet imposed such decrees upon the people that a big armed force was necessary to awe the moujiks into a state of passive subservience.

Of course, the Soviet didn't let the peasants think that was the idea at all. The leaders constantly talked about aggressive forces against the Union of Soviet State Republics among other nations, fomented, they said, principally by Great Britain, so that it was necessary to maintain a big standing army for the safety of the country.

Russia has been talking fight for years, when there wasn't a race on the face of the globe that wanted to have anything to do with it.

Another reason for the big army as that it could be used to menace India, and it may have been hoped thereby to coerce Great Britain into doing the things Russia wanted her to do.

As time has passed and the Soviet realizes that their little game isn't working out as they had figured, they are coming to the conclusion that the big army is a burden that cannot be kept up much longer by hoodwinking the people as to the necessity for its existence.

And so, the presence of Russia at the next disarmament parley will give the Soviet an opportunity to make a magnificent gesture of peace ideals by offering to cut down an army they don't really want. It gives them an opportunity to step down without loss of credit.

And so the motive what it may, however, the advent of Russia at a disarmament conference is welcome for itself alone. It will remove the fears of other nations in Europe which have not quite liked the length of the bear's claws.

## Search For Valuable Mummy

Body Of Ancient Queen Disappeared

Search through the museums of the world for the mummy of Fawn Ilo, an Amazon with bobbed red hair, whom archaeologists believe ruled the cave land civilization of Kentucky thousands of years ago has begun.

The perfectly preserved body of the ancient queen, wrapped in deerskins and buried with royal splendor, was unearthed in mammoth cave in 1913. Until 1950 the mummy was exhibited in mammoth cave, but at that time it disappeared.

## British Columbia Minerals

"I have the greatest faith in the numerous discoveries of economic minerals in British Columbia. This Province seems to have the largest assortment of minerals of any of the provinces, and its varying climate and frequency of outcrops of bed rock render it a very favorable field."—Sir Albert E. Kilton, director of the geological survey of the Gold Coast Colony.

James Lane Allen, the author, was asked by a lady if he was a bachelor for choice.

"Yes," he said at once.

"But isn't it rather ungallant of you to say that?" said the lady.

"You must ask the ladies that," said Allen. "It was their choice."

Economy is the fine art of doing without something without your neighbors suspecting it.

"After committing the crime you cut up the body!"

"Yes. To get rid of it! What would you have done with it?"—Ray Dine, Paris.

For Mild Winter Climate, Good Accommodation To Suit All Pockets. The Farmers' Holiday Playground.

P. O. Box 608, Victoria, B. C.

## WORLD HAPPENINGS BRIEFLY TOLD

January 17 to 20 inclusive are the dates for the annual convention of the United Farmers of Alberta, probably in Calgary.

The average cost of a weekly family budget of 29 staple foods was \$10.59 at the beginning of October as compared with \$10.57 for September.

Sir Harry Lauder, who has been in retirement in Scotland since the death of his wife last summer, will return to the stage in the winter.

All departments of the Alberta Government have been notified their programs of legislation for the next session of the legislature must be in hand by the end of December.

The Rev. Herbert Quarrle, athlete vicar of St. Andrew's parish, Jersey, proposes to conquer the English Channel in an exhibition swim to raise money to complete the building of his half-finished church.

France is rapidly becoming the greatest producer of new postage stamp issues in the world. In addition to recent special stamps issued in honor of the American Legion visit, four special issues have appeared within a month.

Monsieur Bey, Turkish diplomat, has been appointed Turkish ambassador at Washington. Turkey has not been represented by an ambassador at Washington since the break in relations between the U.S. and Turkey when the U.S. entered the world war.

Lawyer: "Why do you want a separation from your wife? Aren't your relations pleasant?"  
Tired Business Man: "Mine are, but hers are perfectly horrid."

All a man has to do when he goes shopping with his wife is to take notes.

For all pains—Minard's Liniment.

It's a pretty safe plan to judge a man by the people he doesn't keep company with.

## The BABY

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and can almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic, constipation, diarrhoea, or need to aid sound, natural sleep.

Just one warning: It is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

W. N. U. 1708

## Alberta Steers For Chicago

Price Received Sets a New Figure For This Season  
Forty-one head of Alberta grass-finished steers shipped to Chicago last month set a new figure on that market for this season for this class of cattle. These steers sold at \$14.65 per hundred pounds, exceeding the previous high price by 65 cents. Good prices on the American markets have attracted large shipments of cattle from the western provinces during the past few months.

Flared Skirts Are Shown On Many of the Newest Frocks

This charming one-piece frock, having the appearance of the two pieces, would be smart if fashioned of either satin or soft woolen material. The modish flared skirt is joined to the bodice having a scalloped left side opening. The neck may be cut low and simply bound or made high and finished with a round collar. The long darted sleeves have hand cuffs, and a belt causes a slight blousing. No. 1685 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 5 1/2 yards 35-inch, or 2 1/2 yards 54-inch material. Price 20 cents the pattern. Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

## Watch Winds Itself

A Lancashire man has made a watch that winds itself. It is intended to be worn on the wrist and has a small weight ingeniously incorporated in the mechanism. The movement imparted by the arm as it swings while walking causes the swinging weight to give a turn to the spring. The spring will keep wound for forty hours, and only half an hour's swinging is necessary to wind the watch.

## Exhibiting Mystery Wheat

New Variety Will Be Shown At Chicago By Alberta Grower  
Herman Treile, of Wembley, the Alberta wheat wizard, has definitely decided to exhibit his "Mystery" wheat at the forthcoming International show at Chicago.

Reference has been made from time to time to this new variety of wheat with which Mr. Treile has been experimenting, but it was not by any means certain whether he would include it in his exhibit at Chicago this year.

It is the general expectation among grain men that it will create a little greater interest than his Marquis wheat last year.

Wheat growers everywhere have been keenly interested in the experiments that have been carried on by Mr. Treile inasmuch as it is stated this new variety will ripen quite ten days or a fortnight earlier than Marquis. Mr. Treile states that the "Mystery" has been the best wheat grown on his farm this year. Test samples weighed more than seventy pounds to the bushel and graded No. 1 Northern.

In addition to its early ripening it is claimed that the new wheat is much more frost resisting than any other wheat known. What Mr. Treile has aimed at is to produce a wheat that would lend itself to be cut and threshed by the combine harvester and yet be equal, if not superior, to Marquis, particularly so far as its milling qualities were concerned.

## Aided Progress Of Locomotion

Albert Champion, Spark Plug Manufacturer, Dies in Paris  
Albert Champion, Franco-American Spark Plug manufacturer, died recently in Paris while on a vacation from the United States.

Champion's life was devoted to keeping up with men's progress in locomotion. From a messenger boy in Paris at 6 francs a week he became one of the speediest cyclists in the world. With the coming of the internal combustion engine he became an automobile racing driver.

Champion then emigrated to America, where, in 1905, he founded with W. O. Durant, the automobile manufacturer, the Spark Plug Company, which made him a millionaire, with plants in America, England and France.

Only a few days ago he remarked that the two things of which he was most proud were his bicycle championships and the fact that his spark plug fired the motors that carried Lindbergh, Chamberlin and Byrd across the Atlantic. His age was 47.

In honor of Benjamin Franklin, a tablet has been erected at Auray, France, to mark the spot where the distinguished citizen of this country landed for one of his brief visits to that country.

A subway system of pneumatic tubes beneath New York streets delivers 5,000,000 letters daily to sub-stations.

## National Parks Attract Tourists

Many Distinguished Visitors Were Guests At Mountain Playgrounds This Year

Tourist travel to the National parks during the season that is just closing has been exceptionally heavy and the number of distinguished visitors the largest in the history of the parks. The most notable of these, of course, Their Royal Highnesses, the Prince of Wales and Prince George, who, with Premier and Mrs. Baldwin and other members of the Royal party, spent several days informally at Banff and Lake Louise resting after their strenuous tour across Canada.

Earlier in the year Banff was honored by a visit from Their Excellencies, Lord and Lady Willingdon, who spent a few days there on their first trip to the West. This autumn their Excellencies returned for a couple of weeks' holiday in Jasper park, enjoying with their party the fishing, golf and motoring of that superb Alpine playground.

The number of private parties, many of which travelled in special trains, was also unusually large, and included a special party of delegates to the Pan-Pacific Relations Congress at Honolulu, among whom were Sir Frederick Whyte, Viscount Castle-rough, Lionel Curtis, famous founder of the Round Table, Malcolm MacDonald, the Hon. William Astor, son of Lord and Lady Astor, the Hon. Hugh Wyndham, Sir Arthur and Lady Currie and a number of other prominent citizens of the Empire.

Other visitors were the British Editors' party of about 120, a party of delegates from the World's Poultry Congress comprising over 100, and 300 delegates to the Triennial Congress of Mining and Metallurgy. Special parties from the United States included 400 members of the Investment Bankers' Association, travelling in four special trains; the New Outlook Magazine party numbering 200; and delegates to the Convention of Real Estate Men, who toured in two special trains. Several large special parties came also from Ontario and Quebec, including one of about 150 visitors who travelled under the auspices of Laval University, Quebec.

## Indians Return To Forefathers' Religion

Tribe Of Six Nations Will Restore Old Deities

Closing a three-day religious powwow at the Cagauwawaga reservation, just across the St. Lawrence river from Montreal, Indians of the six nations decided to abandon the Christian religion and return to the religion of their forefathers.

Old Indian deities worshipped before the white men invaded America and made famous in Longfellow's "Hiawatha," will be restored.

Chief American Ilorso and Chief Two Axes are the leaders in the reformation. The three-day powwow has been in the inaugural of religious services of their forefathers' religion. One of the leaders said they were turning back to their forefathers' God, the Great Spirit, for sympathy in their present state, tied down as they were by the white man's laws.

Essential For Business Success  
Values and service are the Siamense (wise) of business—cut them apart and they die. Your success depends absolutely on whether or not you are honestly giving these two things to the public for its money. Disregard them and you do not advance.

## SUNDAY SCHOOL LESSON

NOVEMBER 27

ISAIAH TEACHES TRUE WORSHIP

Golden Text: "Who shall ascend into the hill of Jehovah? And who shall stand in His Holy place? He that hath clean hands, and a pure heart."  
—Psalm 24: 3, 4.

Lesson: Isaiah 1: 1-20.  
Devotional Reading: John 4: 21-24.

## Explanations and Comments

I. The Perverseness of God's People, verses 1-15.—"The Great Arrangement" is an apt phrase given to this chapter by Ewald. God's chosen people have rebelled against Him. Even the dumb animals, the ox and the ass, are responsive to their masters, but the people of Judah do not consider their Lord. This perverseness brought punishment upon them, and it is only because of Jehovah's mercy that they have escaped the fate of the people of Sodom and Gomorrah.

II. Outward Signs Of Beligious Zeal Do Not Deceive Jehovah, verses 16-15.—The prophet now turns to the people of Sodom and Gomorrah, which he had just uttered as unfounded, by appealing to their exact observance of the divine law; but in opposition to this ground of self-justification which the prophet has read out of the hearts of those impeached, he proceeds to prove the divine arraignment which begins in verse twenty.

"Hear the word of Jehovah, ye rulers of Sodom," the prophet cries, "give ear unto the law of our God, ye people of Gomorrah." By addressing them as "rulers of Sodom" and "people of Gomorrah," he reminds them alike of their wickedness and of their danger. The "law" to which he bids them give heed, is the inspired discourse he is about to deliver.

## A Dangerous Practice

Despite Repeated Warning Many Run Engine In Closed Garage

At the beginning of cold weather each year, warnings are broadcast against the danger of carbon monoxide poisoning. And each year, like those previous, deaths from exhaust fumes continue to trickle into the news as profusely as ever.

Perhaps this is only a scare, like the railroad crossing bugaboo. We've seen many thoughtless drivers cross tracks without shifting to a lower gear or hesitating a moment. And nothing happened.

Yet news of accidents at railroad crossings continues to be printed, and reckless motorists continue to cross crossings any way but cautiously.

So it is with running the engine in a closed garage. Write about it, broadcast it, hammer it into the heads of some automobile owners, and somehow or other there remain a few who have never read newspapers or listened in on the radio, or whose heads are impervious to the heaviest blows.

This is the hopeless class for which we must continue to keep pulmonologists ready and whose lives we must save.

## World Wheat Harvests

The combined North American crop of wheat in 1927 is estimated at 631,000,000 cwt., a not reduction of 50,000,000 cwt., on the year, but about equal to the five-year average. India's wheat harvest has yielded some 2,000,000 cwt. more than last year's crop. Russia's harvest is generally expected to be 29,000,000 cwt. above the 1926 yield. Hungary's crop will be over average, and Bulgaria's 2,000,000 cwt. more than that of last year. Argentina has some 28,000,000 cwt. surplus wheat.

The mere offer of a match will sometimes light up a girl's countenance.

## Charleston Dance Contest

Judged By England's Leader

Miss Leslie Sutton, chief judge of the Charleston contest for England, writes: "My unique position in the dancing world today would never have happened if I had not taken care of my health. I constantly had that tired out, depressed feeling, with sick headache, indigestion, biliousness caused by the poisons of constipation. Your mild laxative has been of valuable assistance in keeping my system in a daily healthy condition."

All druggists—25c and 75c per box.

—doctors have been prescribing Eagle Brand as an infant's food when mother's milk is not available.

Use it with confidence.

## World's Greatest Menace

Shiftlessness Appears To Be Growing At Alarming Rate

Some people say the Great Menace is one thing and some another. I believe, indeed, that there are several hundred, all of them serious enough.

My opinion is the great menace is growing shiftlessness. Look where you will, and you find lack of respect for the old industry and morality.

People are demanding dangerous liberty; dangerous prosperity.

Debits—public and private—are piling up. People are leaving farms to go to the towns, where they become Citizens of the World, and declare the world owes them a living.

And where business is transacted with difficulty because of the great number of automobiles occupied by people having a good time.

The world has always been shiftless, but the shiftlessness of today is much worse than anything in the past.

We do not lack education; all the higher things are progressing.

But attended by a shiftlessness that is surely alarming.—E. W. Howe's Monthly.

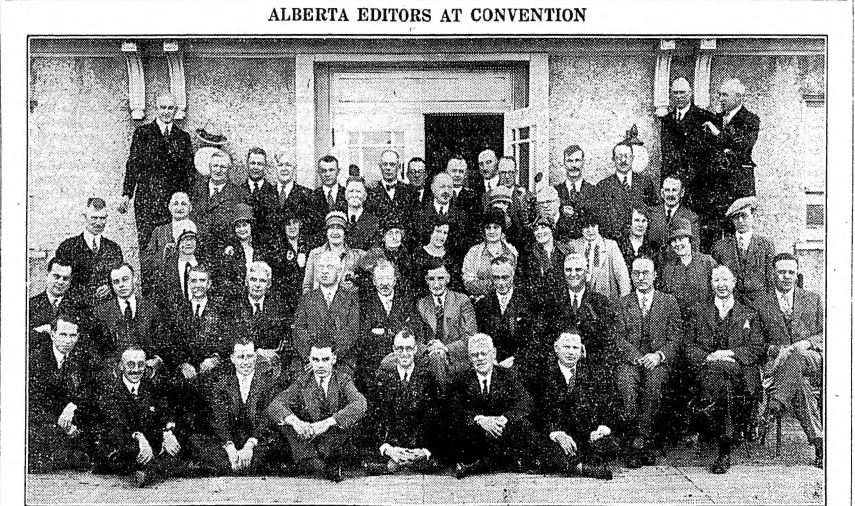

Wise is the man who pays for what he gets and gets what he pays for.

## For Your Stock

Minard's is a handy and effective first aid both in the stable and barn.

The French Senate has voted a subsidy of 2,000,000 francs (about \$500,000) for the expenses of French athletes to participate in the Olympic games at Amsterdam in 1928.

Officers, members and their wives and guests of the Alberta Press Association, on the roof garden of the Palliser Hotel, Calgary, during the annual convention, which closed Saturday, October 22nd.

## REPORT ON ICE CONDITIONS AT PORT-CHURCHILL

Ottawa.—Present conditions at Port Churchill and Port Nelson are similar with respect to the ice situation, according to a statement issued by the Department of Railways and Canals. Both rivers are full of ice, moving up and down with the tides. The statement says in part:

"The Department of Railways and Canals is in almost daily touch with temperature and weather conditions at Nelson and Churchill. The latest message received was on the 14th and conditions at that time were exactly the same at Churchill and Nelson, both rivers being full of ice, moving up and down with the tides.

"On November 6 ice formed temporarily at Churchill, but not to an extent sufficient to have presented any difficulty to ice breakers such as are employed in the St. Lawrence and at the head of the lakes to deal with similar conditions. At that time the approach to Churchill was entirely free of ice, whereas a great deal of heavy ice was visible off Nelson. That has been observed to be a recurrent condition there, and is one of the difficulties associated with navigation in the Nelson estuary where deep water is 20 miles from the partially constructed harbor works. Heavy ice was not observed off Churchill until the 13th instant. Temperature records of both water and air indicate that the season at Hudson Bay is abnormal to the extent of two or three weeks."

## Says Bolshevism Is Being Undermined

End Of Soviet Rule Predicted By Writer

London.—The Warsaw correspondent of the Daily Mail, explaining that he has just returned from Moscow, says that the anniversary occurrences and the consequent action against the oppositionists signify a split in the Communist Party, and "show that forces are at work which in the long run must undermine Bolshevism."

The writer declares that thousands of those who applauded Trotsky's opposition speech November 7, were arrested. It was rumored that Trotsky himself had been arrested and that his supporters in some places had been shot down, but this could not be verified.

A Riga despatch to the Daily Mail reports that Trotsky and Gregory Zinoviev have been outlawed and deprived of their homes and means of existence. The correspondent transmits rumors of possible military revolts, with the Stahn group prepared to take flight if necessary.

## French Hostages Released

Held Captive By Moorish Brigands Until Large Ransom Was Paid

Rabat, Morocco.—The six French hostages kidnapped by the Moorish brigands in October, and held for ransom of 2,000,000 francs, in gold, or approximately \$400,000, have arrived at French outposts.

The prisoners, arrangements for whose ransom had been made, included Yves Steng, nephew of the French resident general, Jean Mallat, Baroness Von Stiehl, Madame Marie Prokhoroff and two little girls named Arnaud, whose parents were murdered recently.

The prisoners were delivered to French outposts at East Batha, at 4 p.m., after the ransom had been paid. Steng and his party were kidnapped on October 22, while on a hunting trip. The two children were kidnapped several days previously.

## Finger Prints By Radio

London.—The successful use of radio to exchange finger prints between the police of Scotland Yard and Chicago was announced here. Finger prints exchanged by wireless enabled the London police to identify a man held here as one wanted in the United States city. The authorities indicated the man would be returned to Chicago.

## Mexico Bans Food Exports

Mexico City.—For the purpose of conserving domestic food supplies, the government has prepared an order forbidding the exportation from Mexico of "articles of necessary consumption." These include corn, wheat, beans, peas, potatoes, salt, butter and sugar. Coal may also be included in the order.

## "Britain's Waning Prestige"

New York Editor Speaks Of Alliance With United States

Chicago.—Great Britain is trying to avert the disintegration of the Empire upon which "the sun never sets" by formation of a union with the United States, Charles Edward Russell, New York editor and lecturer, declared at the trial of William McAndrew, suspended superintendent of schools.

Russell, who was commissioner on public information to England during the world war, was called to substantiate charges of Mayor William Hale Thompson that British propaganda had entered schools of the United States in history texts.

Since the world war, British dominions have drawn away from the mother country and the British foreign markets have been narrowed, Russell testified. A waning prestige in world affairs would be restored through an alliance with the United States, he concluded.

Should London propaganda be successful in the United States and an English-speaking union result, a war between Britain and the United States on one side, and France, Spain, Italy, Portugal, Mexico and South America on the other would be inevitable, Russell predicted.

## Drastic Changes In Manitoba Liquor Law

Will Be Submitted By Provincial Government When Legislature Assembles

Winnipeg.—In a determined attempt to eliminate the bootleg liquor trade from the province, the Manitoba Government has prepared drastic changes in the provincial liquor laws, according to reports emanating from the parliament buildings. It is reported that not only will the sale of beer by the glass be instituted, as the electors demanded in the plebiscite of last June, but the government will provide for the sale of hard liquor through a cash and carry system.

The Manitoba Free Press says: "Sweeping changes in the liquor laws of the province are made in the legislation which the provincial government will submit when the legislature assembles early next month. 'All existing liquor legislation is repealed and the new law will, according to unofficial but reliable reports, provide not only for the sale of beer by the glass, but for the sale of hard liquor by the bottle, or the cash and carry system.'"

## Twenty-five Nations Enter Olympic Games

Hockey Players From Canada Will Participate In Winter Sports

Geneva.—Twenty-five nations have announced their intention to date of participating in the second Olympic winter games in February, 1925, at the famous Swiss winter sport resort of St. Moritz.

Preparations under way as well as the entries that have been made indicate the games will exceed in interest from every point of view the first Olympic winter contests that were held in 1924 at Chamonix.

The official program which will cover a period of a little more than one week, from February 11 to 19, includes individual contests, team contests and demonstrations. These cover skating, skiing, hockey and bob-sledding, besides demonstrations of "ski-joring" or skiing behind horses.

The hockey contests will have representatives of the best ice teams of the world, including those of Norway, Sweden, Poland, Czechoslovakia, Canada and many others.

Pays Death Duties

London.—Right Hon. Winston Churchill, chancellor of the exchequer, announced in the House of Commons that Lady Houston, widow of Sir Robert Houston, had paid to the government \$7,500,000 as an "act of grace," despite the fact that the wealthy shipbuilder before his death moved to Jersey Island, presumably to avoid the high British death duties.

A More Unified Canada

Toronto.—Despite the attractiveness added to farm life by modern conveniences, Canada's youth will not stay on the land until agriculture is put on the same footing as industry, declared Premier J. E. Brownlie, Alberta, speaking here. He also stressed the inter-dependence of the provinces in urging a more unified Canada.

Fined For Cruelty

Ottawa.—Carrying live hens with their heads downward causes the birds unnecessary suffering, Magistrate Hopper held in the police court here. He fined two women who persisted in carrying their fowl in that manner after they were warned by the Humane Society inspector.

## Figures In British Finance

E. R. Peacock, M.A., of London, England, former Canadian, son of a Glasgow minister, and once on the staff of Queen's University, Kingston, who is now a dominant figure in British finance. He is at present in Canada and calls the Dominion the country of the future.

## BRITAIN DECIDES ON REDUCTION OF NAVAL PROGRAM

London.—Although provision was made in current naval estimates for laying down three new British cruisers this fiscal year, only one will actually be laid down, Right Hon. W. C. Bridgeman, first lord of the admiralty, told a questioner in the House of Commons.

Mr. Bridgeman said the Government had decided that in view of the situation disclosed at the recent Geneva tripartite naval disarmament conference it was not necessary to proceed with laying down the other two vessels this year.

Commenting on the statement The Westminster Gazette's political correspondent says:

"The Government at last has bowed to the storm of protest from the country on the excessive national expenditure and the need for further disarmament measures. Whether, however, Mr. Bridgeman's statement is a concession in form or of substance cannot be determined until next year's shipbuilding program is presented to Parliament."

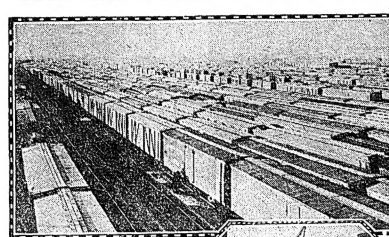

## Prince Is Popular

London.—The second unruly demonstration by admirers of the Prince of Wales within a few days occurred recently when 5,000 women and hangers, who had gathered to watch the Prince emerge from a moving picture show, rushed his automobile.

## Change Design Of British Coins

London.—On December 1, for the first time since 1816, a simultaneous change in the designs of all British silver coinage will be effective. Gold and copper coinage will not be affected. The alterations are all on the obverse side.

## C.P.R. Handles Record Amount of Grain

1. View of Grain Cars at the Transcona yards, Winnipeg. 2. Loading Grain Freighters at Port William.

Grain marketing and loading figures for the week of October 22 to 28 constituted a record for the Canadian Pacific Railway since that company first handled grain out of the West. During the same week the peak of the grain rush was reached and the bulk of the great crop of 1927 hauled to elevators ready for shipment. This period saw 25,331,000 bushels of grain marketed over Canadian Pacific lines, an increase of 11,778,000 bushels over the same period of 1926, which year was considered one of the greatest grain years in history of the west.

Monday, October 24 was the record day when 5,110,000 bushels were marketed. This exceeds by several million bushels the total grain production of western Canada in the year 1887.

As a result of the heavy marketing the grain loadings reported by this railway reached a record figure. For the same period this year, 15,552 cars

## Electric Accumulator Is Latest Invention

Device May Revolutionize Every Form Of Transportation

London.—An electric accumulator, stated to be powerful enough to drive an express train over a long distance on any existing track without a third rail or overhead wires, is being secretly tested in London, says the Daily Express.

The accumulator, or storage battery, is the invention of a Spanish Jesuit priest, Father Almolda, of Salamanca, who is backed by a group of prominent British financiers. The device can also be used on automobiles, the paper said, which foreshadows the possibility of its revolutionizing every form of transportation.

A company has been formed to develop the invention but its directors have refrained from advancing claims for it until its success is demonstrated.

## Winners At Royal Show

Gain From Saskatchewan and Manitoba Given Prizes At Winter Fair

Toronto.—A sample of the new variety of wheat, known as Reward, exhibited by William Pierce of Birle, Man., took first prize in the spring wheat (except durum), competition at the Royal Winter Fair. Some 50 samples were entered in the class.

Second and third places also went to Western exhibitors, Joseph Hanes, of Orkney, Sask., taking the second ribbon, with his exhibit of Marquis wheat, while George S. Canfield, of Wilfrid, Sask., won third place, also on Marquis.

In the Durum wheat class William Darnborough, of Laura, Sask., took first place, while his son won second prize, and J. W. McChie, of Marquis, Sask., was awarded third.

All fall wheat prizes went to Ontario exhibitors.

## Name Stations On H.B. Line

Request Made To Name Stations After Men Who Boosted the Road

Saskatoon.—Commissioner J. H. Holmes, of the local Board of Trade sent the following telegram to Hon. C. A. Dunning, minister of railways: "Ottawa press dispatch, fourteenth instant, states names of stations on Hudson's Bay Railway are now being decided upon. In that connection we courteously express the hope that justice will be done to Saskatchewan men identified for over 49 years with day project, and concerning whom unanimous public opinion concedes the rendering of essential service in furtherance of opening the Hudson Bay route. Please acknowledge receipt."

Gives Figures To Government

London.—Sir Arthur Steel Maitland, Minister of Labor, replying in the House of Commons to a question asked in the past 12 months 82 men had applied at Labor exchanges in Liverpool and district for settlement in Canada. Ten of these, he said, had withdrawn their applications and 36 were not acceptable by the Dominion authorities.

## United States Decides To Co-Operate On Disarmament Question

Geneva.—The United States has officially decided to continue its co-operation with the special disarmament commission created by the League of Nations for the preparation of a general conference on reduction in world armaments.

Washington notified the League that Hugh R. Wilson, United States minister to Switzerland, has been appointed American representative on the commission which meets at Geneva, November 30, to continue work on the preparation of a draft treaty.

Man With the Longest Beard Dead

Winnipeg, N.D.—Jas. Langstaff, 82, Highland County farmer, famous for his 17 foot beard, is dead. For years after letting his beard go uncut from July 14, 1875, he travelled around the world with a circus without meeting a match for his beard, which he could wrap around his neck like a long muffler. In 1922 he won the world's longest beard championship at the days of '49 celebration in Sacramento.

Denied Vote In Ireland

Belfast, Ireland.—The Northern Ireland legislature, by a vote of 25 to 14, has rejected Joseph Devlin's bill giving women the right of franchise at 21, the same as men. Premier Lord Craigavon said that when the Government later introduces its bill to abolish proportional representation it should be embodied in a provision for the enfranchisement of women at 21, if the British parliament did the same.

## Gigantic Airplane Carrier

Camden, N.J.—The United States navy's newest and largest aeroplane carrier, the Saratoga, has gone into commission. Capable of making 23 knots, with its electrically driven propellers, the mammoth 35,000-ton ship is also said to be the fastest large boat afloat. It is to be equipped with 55 aeroplanes and when completed will be assigned to the Pacific fleet.

## Horses For Chicago Show

Western Canada Breeders To Have Entries In Livestock/Exhibition Chicago.—The horse breeders of Western Canada, long renowned for their success in the production of high grade draft animals, will come to the International Livestock exposition here this week, favored to win a large share of the ribbons in the draft horse division.

Particularly in the Clydesdale class are they expected to make a strong showing. Many of the familiar names among the Canadian breeders are absent from this year's entry list in the Clydesdale class, Haggerty and Black, breeders of last year's grand champion, are not entered, nor is J. H. Pearce, who bred the reserve champion. However there will be a heavy entry from other Western Canadian breeders.

## To Represent Canada

Senator Dandurand Will Leave For Geneva Within Few Days

Ottawa.—Hon. Raoul Dandurand, government leader in the Senate, was appointed Canada's representative at the next session of the League of Nations Council, Premier King announced following a meeting of the privy council. The prime minister declared that Senator Dandurand would leave for Geneva within the next day or two to be present at the forthcoming council meeting.

Senator Dandurand represented Canada when this country was elected to the council of the league this year. The prime minister pointed out that the appointment was not permanent.

## Eight Fighting Planes

Canadian Government Purchases Machines For Military Training

Ottawa.—The Canadian Government will receive eight fighting aeroplanes during the next month to be sent to Camp Dorden, Ont. Planes used in present day military training are divided into three classes—initial training planes, advanced training planes, and service planes. Of the first two classes there are already a number at Camp Dorden, but not actual fighting machines, so the final course of a military airman could not be completed there. The new planes will complete the cycle of training.

## Bandits Attack Train

Soldiers Killed and Passengers Wounded On Mexican Train

Mexico City.—Eighteen soldiers and one officer were killed when a large group of bandits attacked a passenger train between Palmar and Aguascalientes, despatches from Aguascalientes state. The bandits executed the engineer and a fireman.

Three soldiers and six passengers, including a woman and two children were wounded in the attack.

No detailed account of the attack was given, the despatches merely stating one officer and the soldiers, entrenched in one of the cars, fought to the last.

The train afterwards arrived in Aguascalientes with the wounded. It was presumed the bandits had been discovered before the train continued its journey.

Nine soldiers of the train guard were killed and 12 second class passengers and an express messenger were injured when several coaches of the Puebla-Vera Cruz passenger train jumped the tracks and turned over. The accident occurred about 35 miles from Jalapa.

## ALL-CANADIAN PRODUCE DINNER HELD AT OTTAWA

Toronto.—Sixty years of agricultural development in the Dominion of Canada were fittingly celebrated by representatives of the country's basic industry at an all-Canadian products dinner given by Hon. W. R. Motherwell, Minister of Agriculture, on the opening day of the Royal Winter Fair. The gathering was honored by the presence of His Excellency the Governor-General and in addition to the Ministers of Agriculture from many of the provinces, many leaders in the public life of the country were seated at the head table.

Addresses by Lord Willingdon, the Federal Minister of Agriculture, and the ministers from the various provinces reflected the spirit of optimism which prevails throughout the country, the great strides which have been made along agricultural lines since Confederation and the prospects for even greater progress in the future.

Following the greeting of the Governor-General, Hon. Mr. Motherwell recalled the advances made in the industry, laying particular stress upon legislation designed to improve agricultural conditions, and he was followed by Hon. J. C. Elliott, Minister of Public Works, Hon. J. S. Martin, Ontario; J. Desilets, Quebec; Hon. J. A. Walker, Nova Scotia; Hon. L. Smith, New Brunswick; Hon. A. Prentiss, Manitoba; Dr. V. V. Varnock, British Columbia; Hon. W. M. Lea, Prince Edward Island; J. J. Robertson, Saskatchewan and Hon. George Heald, Alberta.

The gathering concluded on a note of caution by the Alberta minister who, while endorsing the optimistic remarks of the various speakers, appealed for earnest consideration of the immigration problem. He declared that because of the great industry which had been built up the question as to further settlement and development should be gone into carefully.

"Who are we going to ask into Canada to develop all these things—any body?" queried Mr. Heald. "Our duty is clearly to give some thought to the people who are to be brought into the country."

## Historic Spot To Be Marked

Place Where Indian Tribes Signed Treaty With Canada Has Been Located

With the marking of the spot where the Lieutenant-Governor of Manitoba and the tribes of the North signed a treaty in 1876, Prof. Arthur E. Morton, University of Saskatchewan, has brought to a close his summer and fall activities in historical work, so far as outdoor operations are concerned. Prof. Morton has returned to Saskatoon from Prince Albert after a visit to a point on the Duck Lake/Carleton trail about one and a half miles from the ferry and near school No. 364. It was near this point the celebrated treaty was "signed" which turned over about 275,000 square miles to Canada. A monument will be erected, probably at the cross roads near the spot, by the Historic Sites Board which is: "ranch of the Dominion Parks Board."

Strangely enough it was an Indian who had been present at the signing of the treaty which is known as No. 6, who guided Prof. Morton to the spot. The Indian is Sasisset, meaning in English, Little Battle snake.

When Prof. Morton went to Prince Albert on his last visit for this year he wanted to get information which would locate the site not only of the treaty ground but some of the old forts as well. He enlisted the aid of J. O. Davis, Prince Albert, veteran of the Royal North West Mounted Police, and Angus McKay, president of the Prince Albert Historical Society. Mr. McKay is conversant with the Cree language. He acted as interpreter. Little Battle snake told the party that he was merely one of the interested bystanders on the treaty ground of 51 years ago. Later, among the chiefs who did not sign at that time was Big Bear.

## Green Feed For Laying Pullets

Sprouted Oats and Clover and Alfalfa Leaves Make Good Green Feed

Sprouted oats and clover leaves both make excellent green feed for laying pullets. The sprouting of the oats, however, involves more labor than preparing the clover, and on this account clover leaves would seem to be the better of the two green feeds to use under average farming conditions. The two feeds have been pretty thoroughly tried out in a series of tests covering five winter laying seasons conducted at the Kapuskasing, Ontario, Experimental Station. One hundred pullets divided into two lots of fifty each were used each year in the tests. The ration fed to each lot was the same except that one lot received all the sprouted oats they could consume from a trough while the other lot got clover or alfalfa leaves from a hopper or thrown in the litter. The average results for the five years showed practically no difference in the total cost of feed, number of eggs laid, cost per dozen of eggs, or profit over cost for the two lots.

## Vancouver Island Sanctuary

Big Horn Mountain Sheep To Be Released In New Game Reserve

Big Horn mountain sheep are the latest species of big game to be introduced to the new game sanctuary here created by the British Columbia game conservation board on Vancouver Island. A carload of 50 of them, the gift of the Dominion Government parks authorities, will be released at Mount Albert Edward in Strathcona Park.

The game board's experiments in transferring game and fur-bearing animals from the interior to Vancouver Island are being followed closely by naturalists and students of zoology. So far, success has accompanied all these undertakings. Muskrats were the first animals to be transplanted to the island. They give promise of becoming the nucleus of an important fur industry here.

## Honored Unknown Soldier

The spirit of Locrano was exhumed in Westminster Abbey at the tomb of the unknown soldier, where a small circle of yellow flowers, placed by a German girl, was found among the many floral tributes sent in honor of Armistice Day. On the flowers was a note reading "To the great unknown soldiers of all nations. From a German girl."

## Airplane Service For Miners

An aeroplane service has been established for miners in the newly discovered fields of New Guinea. The field is on a high plateau, so difficult to reach that the trip requires six days by horseback. Planes come from the coast in about an hour.

W. N. U. 1708

## Are Prophecies From Great Pyramid True?

Alarmists Recall Inscriptions Predicting Period Of Tribulation To Commence In 1923

The Great Pyramid has cast its shadow over Great Britain. Alarmists are recalling inscriptions on the Egyptian Pyramid which predict that a "period of great tribulation" will begin in 1923.

The ninth anniversary of the end of the war, the country is deluged with speeches and articles declaring Europe again is drifting to war.

An article by Lord Rothermere, most powerful newspaper owner in Great Britain, warns that "Europe once again is an armed camp."

"There is no escape from the conclusion," Rothermere declared, "that we are again drifting to the position of 1914, which made a conflagration inevitable."

At least one section of the press now believes that Chamberlain's recent refusal at Geneva to commit Great Britain to further military engagements, and Britain's insistence upon her cruiser claims at the Tripartite Disarmament Conference at Geneva, is due to distinct feelings of uneasiness.

This part of the Press thinks the country has knowledge of dangerous international undercurrents not apparent on the surface. Recent statements of prominent Englishmen seem to support the Pyramid prophecy of tribulation from May 29, 1923, to Sept. 1936. It is recalled here that Lloyd George, the war-time Prime Minister, recently pointed out that there are 10,000,000 men under arms in Europe, a million more than in 1914.

Lloyd George also warned that international jealousies were increasing most rapidly.

## A Home-Made Mending Cement

Rubber Cement That Is Easy For Any One To Make At Home

A rubber cement that is both easy and economical to make and that will mend or patch anything from boots to socks and clothing is described by a writer in the current issue of "Field and Stream Magazine." Here is how it is made:

Cut crepe rubber, taken from the sole of an old shoe, into very small pieces with a pair of scissors. Put these pieces in a wide-mouthed bottle, having a close fitting top. Add gasoline or benzine until the rubber is covered a quarter of an inch or so with the fluid. Let it stand to soften, when it will be found that the rubber has swelled considerably. As the spongy mass absorbs the fluid, keep adding a little more benzine and work it into the rubber. The desired result is to get a thick, clear, jelly-like mass. One shoe sole furnishes the material for over a gallon of rubber cement.

The writer in "Field and Stream" recommends this paste for waterproof matches. Simply dip the head of the match in the cement and let it dry.

## Alberta Cattle For Japan

Prospects For a Good Market In the Orient Set To Exist

Good prospects for the exportation of Alberta livestock to Japan now exist as a result of the recent visit of Capt. T. Kawakami, of Yokohama, who spent some time investigating conditions in the province. Following the visit of H. A. Craig, deputy minister of agriculture, to the Orient two years ago, and the trial shipment of stock sent over at that time, extensive interests in Japan, which Capt. Kawakami represents, have been planning for the importation of beef cattle for slaughter, and beef and dairy cattle, also horses and swine for breeding purposes, on a scale which will greatly increase the volume of Alberta's trade with the Far East if the plans contemplated materialize.

Passenger—Why did you let that pedestrian get away? You could have got him easily.

Driver—He owes me \$20.

Alligators, whose food consists mainly of fish and meat, cannot swallow their food except under water.

"What? He wants 8,000 marks as dowry? I will offer him 6,000. He will probably bargain with me for her!" —Gemmliche Sächse, Leipzig.

## Says Quebec Most Beautiful City

Sir Michael Sadler of Oxford, England, has made up a list of twenty of the world's most beautiful cities. Only Quebec is mentioned in North or South America. Other Canadian cities apparently did not make a list with him when he visited this country in April, 1923.

B.C. Tourist Trade Addressing the Good Roads League Convention, Publicity Commissioner J. Webster, of Vancouver, said that the tourist trade was fourth in the industries of British Columbia and that the influx of visitors in 1925 amounted to 2,500,000.

Teacher: "Name a liquid that won't freeze?"  
Pupil: "Hot water!"

## Soft Pork

Primary Cause Said To Be Unsuitable Feeds

An investigation into the causes of soft pork has been conducted during recent years at the Central Experimental Farm at Ottawa. Briefly, the results show that the primary cause of softness in pork is the use of unsuitable feeds and combinations of feeds, faulty nutrition generally, an unhealthy physical condition, or any cause or combination of causes which check the normal growth and development of the individual. In the investigation an effort was made to determine the influence of such feeds as ground oats, ground barley or middlings when fed singly, both with and without milk by-products, and also a comparison of these feeds with a mixed meal ration. The results have demonstrated that the use of barley alone, oats alone, or middlings alone is more conducive to the production of soft sides than any of these feeds supplemented with skim milk. Any of these three feeds are more conducive to softness in bacon than a mixed meal ration of good balance, although barley fed alone with milk compares very favorably with the mixture, with oats a poor second, and middlings of little use in a mixture. There is an intimate relationship between the stage of maturity or the physical condition of the animal and the firmness of fleshing. Rapidly of gain exercises a lesser but at the same time an appreciable influence on the character of the fleshing, the pigs which made poor gains being mostly soft.

## Would Help Industries

If Municipalities Would Buy Goods "Made in Canada"

If citizens generally would buy goods "Made in Canada," how our industries would thrive.

And how much better general business conditions would be.

In the meantime, if every Canadian municipality would buy—as far as possible—goods "Made in Canada," what a help it would be.

For money paid for wages and raw material does not stand still.

A great deal goes for food, and the farmer gets it.

Some for clothing, and the sheep farmers get it.

It never stays in one person's hand.

## Navy Life Much Improved

Ships Have Equipment As Complete As Passenger Liners

Commander Kenworthy of the British Navy, says that the men aboard ship are much better fed and with a much greater variety of food than ever they had in the past. Instead of each mess of twelve or fourteen men eating for themselves—one man taking it in turns each day to take the food to the galley and dish it up again after it had been cooked—all the rations are drawn and cooked in a variety of dishes by the cooks, under the supervision of the Paymaster's staff.

When I first went to sea, he says, the fresh bread only lasted a few days after leaving harbor, after which we fell back on ship's biscuits. Now there are electric bakeries and excellent bread is baked every day. There, also, are refrigerators worked by electricity, in which fresh meat can be kept even on the longest cruise. The modern ships even have an electric laundry, where the men can get their clothes washed for a very small charge instead of spending their time over the wooden wash-tubs of the old days. The modern ships are ventilated by electric fans driving fresh air from above into all parts of the ship under water and, greatest luxury of all, there are bathrooms with plenty of hot fresh water available for all the ship's company. The supply of fresh water for washing is actually better than in many ocean passenger liners.

## Old Theories Usually Best

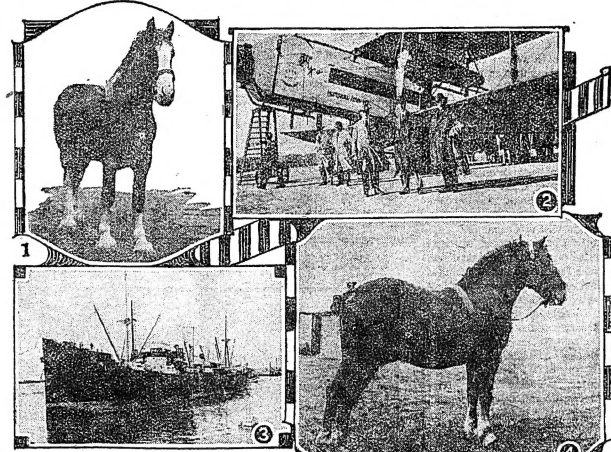

World Needs Something That Has Stood the Test Of Time

The older one grows, the more profoundly one gets to distrust beautiful, new, high-sounding theories for the conduct of life, and the more one longs for something that has stood the test of time—wise, true, faithful words, with the wisdom of the serpent in them as well as the harmlessness of the dove; words upon which one can depend to carry one safely through the quicksands and quagmires and pitfalls that everybody can see crowding upon the path of common everyday life.

It is not new resolutions that the world needs, but some of the old, tried, true precepts of Christianity universally applied.

"Listen," remarked the exasperated driver over his shoulder, "I'd rather get to Paris without any advice from the back seat."

## Champion Stallions of Four Countries

1. "Lord Willington," \$10,000 Clydesdale, one of the finest stallions ever bred in the Old Country. 2. W. J. McCallum, at left, about to board plane for Paris on horse-buying tour. 3. C. P. R. Freighter "Hollingsbrook," 4. "Commander of Morton," an English champion included in the shipment.

What is considered to be the finest and most valuable shipment of horses ever to reach Canada arrived in Montreal recently from England and Europe on board the Canadian Pacific freighters, Bosworth and Hollingsbrook. The animals are owned by W. J. McCallum of Brantford, Ont., and Regina, Sask., and represent the pick of the champion heavy horses of England, Scotland, France and Belgium, having been purchased by Mr. McCallum during a 20,000-mile motor tour of the rural areas of the British Isles and the two countries of Europe. The horses were shipped to Brantford prior to being exhibited at the Winter Fairs to be held within the next few weeks at Toronto, Chicago, Guelph and Ottawa. Some idea of the value of the large shipment, can be obtained by the fact that one of the horses included in the shipment, "Lord Willington" was purchased by Mr. McCallum for a price exceeding \$10,000.

Over a quarter of a million dollars has been invested by Mr. McCallum, in Percherons, Clydesdales, Suffolk and Belgians. His first shipment to Canada this year included 11 animals which reached Montreal in August. The owner, who crossed from England this trip aboard the Metagama, personally looks after the important details in connection with the handling of his horses.

Questioned as to the damage done to the horse industry through the introduction of tractors and other mechanical farm implements to take the place of horses, Mr. McCallum stated that gasoline had done all the damage to the horse industry possible. There was a scarcity of good horses in Canada and Great Britain, he said, due to the fact that the number of good horses bred had greatly decreased. He believes that the introduction of high-class animals into the country will go a long way towards stimulating the raising of better quality horses.

The history of a great number of his horses carry the record of championships won at practically all the fairs and exhibitions in Great Britain, France and Belgium. "Lord Willington," the stallion for which he paid over \$10,000, is the most valuable horse with the present lot and one of the finest horses ever bred overseas. He was the only two-year-old winning double championships in Scotland this year, being champion at the Royal Show, Newport, Scotland, and champion at the Kilmarnock Show. This stallion will go back to Scotland for breeding purposes.

Mr. McCallum's up-to-date method of engaging in the horse-buying industry is borne out by the fact that he does considerable travelling by air, and he recounts many exciting incidents when forced landings were made on account of fog and stormy weather. His systematic tours of rural districts in England, Scotland and Europe are done, however, by motor during the summer months.

## Cleaning Milking Machines

How To Sterilize Machine Parts and Destroy All Bacteria

The milking machine problem is no longer one of mechanical perfection states the Dominion Animal Husbandman in his latest annual report, but it has become a matter of more careful operation mechanically with great care in cleaning from a bacteriological rather than from a visible-dirt point of view. The germ content of machine drawn milk depends upon the care taken to keep the tubes, cups and pails clean far more than upon any other factor. Highly infected milk drawn by machine is nearly always due, not to any fault of the machine itself, but to lack of knowledge on the part of the operator of how to keep the machine parts sterile. The producer must appreciate the difference between a bacteriologically clean machine and one that merely appears to be clean. It is not sufficient to rinse out the pails, the cups, and the rubber tubes so that visible dirt or traces of milk are removed, but it is essential to destroy the bacteria that lurk in all parts of apparently clean but unsterilized machines. After the machine has been thoroughly washed, the tubes and cups should be sterilized either by chemical or heat treatment. The chemical treatment consists of the use of a hypochlorite solution with one pound of chloride of lime to one gallon of water, mixing the powder to a paste with a little water then adding the full amount. The heat treatment consists in placing the tubes and cups in clean, hot water and allowing them to remain in the vessel, covered, until the next milking. The whole question of caring for the milking machine is simplified if the producer begins cleaning by sterilizing after the last milking and keeps up the practice every day in the year.

## An Unusual Restaurant

Gloom-Chasing Cafe Opened In Old London

An "anti-depression restaurant" for women shoppers on foggy days was recently opened by a large Piccadilly dressmaker store.

The restaurant stretches from one end of the store to the other. Artificial sunlight effects are obtained by the glowing golden walls and ceiling of the lounge.

Beams stretch across the ceiling of the restaurant, which is papered in silver. On the walls are dull orange and green lights in shabby globes. The carpet is a yellow with blue "suns" on it, with the chairs and tables of apple green. Shimmering green tulle curtains give an illusion of leaves and woods outside.

"We wanted something that would cheer up women shoppers on dull sunless days which are so common of England in any season, one of the directors declared.

## Jewish Worshipers Ask Privacy

Petition to the Palestine high commissioner by Jewish worshippers at the western wall of the temple known as the walling wall, asks that generally accepted rules in regard to sight-seeing at the holy places in Jerusalem also be enforced at the wall. The Jewish worshippers requested Jerusalem police be directed to prevent sightseers from visiting the wall during the hours of prayer Friday night and Saturday.

## Sale Of Pure Bred Cattle

Twenty-seven head of the herd of pure bred Aberdeen Angus cattle from the farm of Sir James A. Aikins, former lieutenant-governor of Manitoba, were purchased by R. S. Sullivan, of Rochelle, Illinois, at a dispersal sale last month. The balance of the herd was bought by Manitoba farmers.

Bobbie: "Mother says these buns taste like soap."  
Baker: "Toll her they're bath buns!"

Jane—"Did you say the minister talks...his sleep?"  
Henry—"No, I said in my sleep."

"Do you know the lightweight champion of this town?"  
"Yes, my grocer!"—Vikingsen, Oslo.

## There are many ointments but **ONLY ONE** **Zam-Buk** THE GREAT HERBAL SKIN BALM

## PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XII.—Continued

Three miles were in operation now, all owned by the same company and all subject to the same conditions. Every one in the valley felt that his stay was but temporary, so no one called it home.

Facing the station stood the Boarding House, where the single men had their meals, a great weather-beaten building, square as a box, sun-dried and stiring. The front of it bore a sign, printed in black letters on a white board:

"Elite Boarding House,  
McMann, Prop."

McMann knew that Eagle Mines could never be her abiding city. Indeed, she had no hesitation in declaring that Canada would lose her just as soon as she made her pile. She would "go back to God's country," which in this case meant Lincoln, Nebraska. Mrs. McMann had often wondered audibly why she had left. Certainly it was not for lack of friends. No woman ever had more friends, and though absent from them now she was not forgotten. To the boarders she gave verbatim extracts of letters she received. Her friends were very insistent for her return. "Why in the world do you bury yourself alive in that cold country, where they have only three seasons, July, Autumn and Winter—a woman like you, who can make her way any place?" or "Everybody is asking me when are you coming back—you sure would get a royal welcome."

Some of the boarders rather unctuously urged her to go and never mind that—so warmly, indeed, that Mrs. McMann grew rather reserved on the matter. It is sometimes a decided social blunder to agree with everything that is said.

Mr. McMann had returned to his native land the year before, shaking off the rather cumbersome yoke of matrimony at the same time, and leaving a letter saying that so far as she was concerned he was dead—for it certainly was not her fault that he wasn't—and that he would leave her the farm and the insurance, too, if she would sign a paper saying that she would never try to find him. He "heaped to God" she would marry again, though he realized it was a mean thing to wish on anyone; but in another way he would be glad for someone to know from actual experience what he had gone through. And he was "feelin' fine at present and hoped she was enjoyin' the same great blessing."

Mrs. McMann accepted the farm

## SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's  
Vegetable Compound Could Do  
All Her Work and Gained  
in Weight

Melfort, Saskatchewan.—"I had inward troubles, headaches and severe pains in my back about five years ago. I was so sick generally that I could not get up. I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of bed or weary and can't sleep I always take another bottle of the Vegetable Compound. I find it wonderfully good for female troubles, and have recommended it to my neighbors. I will be only too glad to answer any letters I receive asking about it."

WILLIAM RITCHIE, Box 485, Melfort, Saskatchewan.

W. N. U. 1708

And he did not retaliate by telling her a word about himself.

Young Mr. Doran was deeply impressed when Mrs. McMann hinted at some dark and mysterious disease bravely borne: "I am dying on my feet," she had told him the second day he was there, "but no one will know it till I am gone. It's my way. It's the proud Weekes way. I was a Weekes. Cut me in inches if you like, I will never complain. Poor Mr. McMann often remarked on it. 'Girl, you're a wonder,' he often said—he was a great hand to call me 'girl'—he said I was always just a girl to him."

"But see here, Mrs. McMann," protested Jack, in real concern. "Why don't you get help here? You're foolish to work so hard. You have plenty to do when you do the cooking. Get a girl to do the dining-room work—there are lots of girls who would be glad of a job for the summer away."

"No, I've tried girls. They get lonesome. It's too far from Jasper Avenue and the Allen Theatre. I don't know what's got into the girls nowadays—they won't work—all they want to do is to tramp. They can't cook—they won't learn. They'll get on canned stuff when they get married, and starve if they lose their can openers. No I won't have another."

"But there's lot of good girls, smart and tidy and all that," protested Jack.

"Yes, maybe, but where could I get one of them?—You tell me and I'll tell you."

This conversation took place at noon. On the four o'clock train came Helmi.

The sun poured down with a pitiless glare on the conformed ugliness of the little boxlike houses. The kindly white snow which had covered the littered backyards, was gone, and now there came in full the piles of cans, discarded clothing, old boxes, old boots, which the snow had mercifully hidden. Water stood in puddles on the one little street where the general store, the hotel, postoffice, mine office, and boarding-house, sat side by side all looking at the station, which because it belonged to a system and was not dependent on local caprice, had walls of stone gray and a red roof. So far as could be seen, not another bit of paint had ever gained a foothold in Engle Mines.

(To Be Continued.)

## Homesteads in H.B. Area

Excellent Land in North Soon To Be Available For Settlement

The Saskatchewan Board of Trade and The Saskatchewan Daily Star has successfully co-operated in urging upon Ottawa, that lands tributary to the Hudson Bay Railway be thrown open for homestead action. It is now announced that immediate action will be taken.

The famous clay land, estimated to contain between 6,000 and 7,000 square miles will alone provide 25,000 farms of 160 acres each.

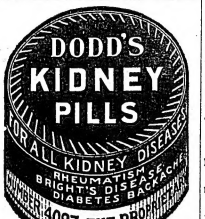

It is conceded that the successful growth of wheat, oats, barley, fodder and root crops at the experimental stations at Mile 137 and Mile 185 have been an effective demonstration of the agricultural possibilities of the lands soon to be available for settlement.

Commissioner J. H. Holmes has strongly impressed to Premier Bracken of Manitoba, that land near The Pas be thrown open and asked his support that homestead areas be defined in Northern Manitoba, and it has been suggested to Ottawa, that to facilitate economical entering by intending homesteaders, sub-land offices be established north of The Pas.

**Cheapest Of All Oils.**—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada, from coast to coast, and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price no one should be without a bottle of it.

**Silk Manufacturing**

One of the largest French silk manufacturing firms will establish a factory in Canada. The plant will likely be located in the St. Catharines district, Ontario. There will be an initial installation of from 30 to 35 looms and 40 hands will be employed.

Of the millions of packages of Red Rose Tea sold, few, if any, are returned as unsatisfactory. That's because Red Rose is packed only in Aluminum. There is never any loss of flavor through dampness. Never any staleness or deterioration. The bright, clean aluminum container keeps Red Rose as fresh and flavorful as the day it was packed.

## A German On Russia

**Misery Among the Working Classes**  
**Described As Appalling**

A well-known German Socialist, Dr. Otto Friedlander, who took a trip through Russia this summer, and was permitted by the Soviet to study conditions in the country at will, has just published his impressions. Living conditions he found very bad. Two families often have to live in one room, separated merely by a chalk line. The misery among the working classes has resulted in an army of parentless and homeless children, who live by begging, stealing, and sometimes by even worse methods. While the Soviet authorities spend gigantic sums of money for propaganda purposes, a generation of criminals is springing up, whose forcible destruction is being seriously demanded by the Russian peasants. The suppression of freedom of opinion is absolute, and for non-Russian minorities, intellectual depression lies over the land. Dr. Friedlander's opinion is that the position of Russia is bad, and that, if fresh credits are not obtained from abroad very soon, the country will undergo fresh economic shocks.—Dublin Irish Times.

## Radio Reduces Cable Receipts

Wireless Generally Has Cut Finances Of Office Systems

A disturbing report with regard to the financial results of the Pacific cable, the Canadian Press learns, will be presented shortly to the governments concerned—those of Great Britain, Canada, Australia and New Zealand.

The use of Empire radio system and wireless generally has resulted in a sharp reduction in the Pacific Cable Board's receipts at the rate of \$25,000 (\$475,000) annually, it is said, and this will not represent the peak of the board's loss.

The Pacific Cable Board is apprehensive that the Dominion station at Montreal, which will be completed shortly, will result in increased competition and will affect unfavorably the present cable traffic from the U.S.

The receipts of the Pacific Cable Board for the current year may meet the expenditures, but it seems inevitable that future years will show a loss.

## Garnet Wheat In Alberta

May Largely Replace Other Varieties

On heavy black and experimental data and field observations indicate that Garnet wheat will fill a long felt need in Central Alberta, states the superintendent of the Lacombe, Alberta, Experimental Station, in his latest report. It gives a yield which compares favorably with the highest yielding varieties and matures as quickly as any of the early maturing sorts with the exception of Prelude. An area of 61 acres of Garnet wheat was grown at the Lacombe Station last summer and the average yield was 49½ bushels per acre although only 15 per cent of the area was summer-fallow or fallowed a hold crop. Samples of the wheat were placed one grade higher than Marquis. The superintendent believes that Garnet will largely replace other varieties on the heavier black land of central and northern Alberta where late maturing kinds are subject to frost injury.

## And This Is Law

Connecticut has a windshield wiper law which says all motor vehicles except motorcycles must have windshield wipers. Albert Rubenstein had a truck but no windshield wiper. As a matter of fact there was no windshield on the truck to be wiped. There was the windshieldless truck and there was the law. The law won. "Five dollars and costs," said Judge Deming in town court. Albert is in the market for a wiper.

The custom of calling Boston the Hub comes from a saying by Oliver Wendell Holmes in his "Autocrat of the Breakfast Table" that "Boston Statehouse is the hub of the solar system." The saying was corrupted to "hub of the universe."

He: "I had a wonderful time at your party last night."

She: "Why, I had no party last night."

He: "That so? Well, believe me, I was at somebody's party."

Minard's Liniment for Chilblains.

## Endorse Work Of World Alliance

Messages From Prince Of Wales and Premier King Read At Meeting

Endorsements of the work of the World Alliance for International Friendship and expressions of hope for continued world peace were contained in messages from four countries read at the International Goodwill Congress at St. Louis, Mo.

Two of the messages were as follows:

H.R.H. the Prince of Wales, through Sir Godfrey Thomas: "His Royal Highness' feelings are in full sympathy with an organization that seeks to make more effective the influence and the conscience of Christianity in striving to prevent causes which ultimately lead to war."

Hon. W. L. Mackenzie King, Prime Minister of Canada:

"The influence of the churches cannot fail of reaction on public opinion, if Christian men and women everywhere but unite in furthering the ideal of peace on earth, good-will toward men, which is the very foundation of all true happiness and progress."

## B.C. Whale Catch

The total whale catch on the British Columbia coast this year amounted to 261 mammals, it is announced by Captain George Lemarquand, following the return of the last of the Consolidated Whaling Corporation's fleet from the hunting grounds off Queen Charlotte Islands. Last year 269 whales were taken—an increase of 8 over this year's catch.

## THE ONLY MEDICINE BABY HAS HAD

Is What Thousands Of Mothers Say Of Baby's Own Tablets

Once a mother has used Baby's Own Tablets for her little one she will use nothing else. Experience teaches her that they are without an equal for relieving baby of any of the many minor ailments which afflict him at one time or another. The Tablets never fail to be of benefit—they cannot possibly do harm as they are guaranteed to be free from all injurious drugs.

Concerning Baby's Own Tablets Mrs. Russell (Mrs. Norwood), says:—"I shall always have a good word to say for Baby's Own Tablets. I have given them to our baby girl. In fact they are the only medicine she has ever had and I am proud to say that she took second prize at our baby show. She is eleven months old and weighs 22 pounds. No mother whose child is peevish or ailing will make a mistake in giving Baby's Own Tablets."

Baby's Own Tablets are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Some people can't stand prosperity and some can't even get a chance to try.

Minard's Liniment for Neuritis.

"S" is a dangerous letter in a controversy because it turns words into swords.

## Christmas draws near!

Spend this Christmas overseas with the Old People. You'll never regret it. Don't put off until next year. Who knows what changes a year may bring? See a steamship agent and make your reservation to-day.

Round Trip from \$155 up. Children half fare—everything included.

## Little Helps For This Week

Now the God of hope fill you with all joy and peace in believing, that you may abound in hope.—Romans xv. 13.

Ah! yet when all is thought and said, The heart still overrules the head; Still what we hope we must believe, And what is given us receive; Must still believe, for still we hope That in a world of large scope, What here is faithfully begun, Will be completed, not undone.

—Arthur Hugh Clough.

All which happens through the world, happens through hope. No husbandman would sow a grain of corn if he did not hope it would spring up and bring forth the ear. How much more we are helped on by hope in the way to eternal life.

—Martin Luther.

Simple and Sure. — Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

A man's sins seldom find him out until after his neighbors expose him.

If you would have a good servant select neither a friend nor a relative.

## ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

**Physicians prescribe Aspirin; it does NOT affect the heart**

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to be on the safe side against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

## The School Column

Rev. Harry Humble, the evangelist, visited the school on Tuesday afternoon, and gave a few minutes' very interesting talk to the scholars on "Life."

Owing to the irregularity of the attendance in the High School, there were no examinations at the end of the month of October. The High School results will be published early in December. The following are the results of the examinations in the Public School for the months of September and October:

## GRADE I. SENIOR

Rudolph Pfeifer, William Hermann, Joyce Milligan.

## GRADE II.

Gilbert Gilbertson 98, Teddy Demaree 97, Edith McLean 97, Virginia Dressel 95, Johnny Kautz 93, Lorna Chapman 92, Robert Sandman 90, Ernest Hermann 90, Evelyn Dawson 81, Billie Johnson 65.

## GRADE III.

Ruth Hurley 86, Arthur Loader 84 3, Kathleen Proudfoot 83, Mildred Brownell 82, Chester Rider 81, Allan Carter 74 8, Walter Rosenau 72 6, Sara Newfold 69, Hellenia Rosenau 64 6, Harold Dressel 60 6, Evelyn Vennard 56 3, Norman Jacques 47 5.

## GRADE IV.

Ross Sandman 84 5, Jack Johnston 82 8, Bruce Young 82, Jack Loader 80 16, Lorna McLean 78 16, Myrtle O'Malley 61 1, Earl Robinson 57 1, Dean Tompkins 50, Gabrielle Massey 37 7.

## GRADE V.

Keith Wright 87 3, Bobbie Bray 83 4, Mabel Gilbertson 81, Milton Dressel 80 8, Colin Bray 78 4, Grace O'Malley 72 5, Frank Marcy 72 1, Lorne Rideout 68 3, Leslie Smith 67 1, Lyle Milligan 66 5, Helen Dawson 63 5, Robert McLean 61, Raymond Vennard 59 3, Ernest Gilbertson 57 1.

## GRADE VI.

Betty Milligan 83, Kenneth Dawson 78, Ma Rennie 76, Fred Vennard not ranked.

## GRADE VII.

John Howton 67 5, Marjorie Lee 67, Margaret McLean 67, Celestine Dressel 63 75, Harmon Vanhook 58 75, Margaret Peters 57 75, Urdine Brownell 46 5, Jean MacIntosh 45 5.

## GRADE VIII.

Gladys Wright 87, Elsie Smith 86 5, Beulah Vennard 82 5, Sydney Demaree 81, Muriel Smith 62 5, Mabel Young 60.

Mr. Jas. Innes, of Calgary, auditor for the C. N. R., was in Chinook for a few days last week.

## The Value of Good Sires

Whether it be horses, cattle, sheep or swine the value of a good sire as compared with a poor one can hardly be over estimated. The cost often occupies a dominant place and keeps too many from purchasing or using the animal which most nearly measured up to the highest ideal. A good bull is cheaper at \$500.00 than a poor one at \$100.00 or for \$5.00 added to the stallion fee to procure the services of the best stallion may mean that the cost will be worth \$150.00 more when ready for the harness. A breeder cannot be criticised for asking a good price for the good animal for the animal has cost something in years of constructive breeding and selection and too few are producing really high class sires. A sire of any kind which has proven his value should never be sold on the commercial market but rather transferred from one place to another as necessary as long as he gives satisfactory service. The Dominion Experimental Station at Scott, Sask., has just purchased an aged Dual Purpose Short-horn bull, Red Marquis-156496-which is one of the best that could be procured in Canada.

## Wheat Pool Opens London Office.

D. L. Smith, who was recently appointed manager of the London England, office of the Canadian Wheat Pool, will shortly enter on his new duties in the old country, where an effort will be made to extend the pool's business. Mr. Smith will be accompanied by R. A. McPherson, who will supervise the opening of the new agency.

Rev. Harry Humble left this morning for his home in Calgary. Duncan Roberts left Wednesday morning for Edmonton, where he will attend school.

Mrs. Howton, who has recently undergone an operation in Calgary, returned to her home last Tuesday.

## Here and There

What is considered the largest grizzly shot in the Canadian Rockies this season was taken by Miss Van Vleck, daughter of Ernest Van Vleck, prominent New York architect who headed a hunting party into the Selkirk district. The party went in north of Revelstoke.

An amount of grain greatly in excess of the entire production of western Canada in the year 1887, 4,454,000 bushels, were hauled to elevators over Canadian Pacific lines in one day in the west during the middle of October. This constituted a record haul of grain for this railway company.

The second shipment of horses from Canada to Russia was a record shipment, according to Louis Kon, Soviet representative, there being only one horse that died during the passage. The next shipment is expected to go forward in November, and this will bring the total number up to 100.

G. N. Torgren, ex-M.P. for Sweden, recently left for U.S. Forest River Country in order to locate suitable farm land for the establishing of a large colony of Swedish farmers, who are said to be in a position to undertake farming on an extensive scale. He has already canvassed Mexico and the Southwestern States, which he finds unsuitable.

The new Canadian Pacific Railway elevator at Midland has begun to receive grain, and shortly all the construction work will be complete and all departments of the plant in operation. The opening of this elevator marks the extension of Canadian Pacific enterprises to another port on the Great Lakes and a new factor in retaining a greater proportion of the Canadian export grain trade for Canadian ports.

The largest party of major league baseball stars to hunt moose in New Brunswick entered the woods for a two-weeks stay after the World Series. The party entered at Glenora on the Canadian Pacific main line and included Benay Bengough, Mark Koenig, Eddie Collins, Joe Bush, Sam Jones, Fred Hoffman. A number of newspaper writers and cameramen were included in the party.

The two new Canadian Pacific passenger ships, "Duchess of Athol" and "Duchess of Bedford," now being built for the St. Lawrence route (Liverpool to Montreal), will be two of the finest vessels afloat, according to plans and specifications. Their gross tonnage will register 20,000. They will be twin screw with geared turbine engine, will have a length of 596 feet, a breadth of 76 feet and a speed of 17 1/2 knots. Both ships will have accommodations for 572 cabin, 430 tourist third class and 508 third class passengers.

The initial consignment this year of Canadian apples for Great Britain, has gone forward on the Canadian Pacific liner "Montreal" from Montreal. They are consigned by the Fruit Branch of the Dominion Department of Agriculture from the Province of Ontario and consist of forty standard boxes containing about 4,000 apples to be put on exhibition at the Imperial Fruit Show scheduled to be held at Manchester this month. Varieties include Golden Russet, McIntosh, Spies, Wolf River, Cran Pippin and Baxter. On the same vessel are 25 cases of vegetables also for exhibition in England.

## Provincial Seed Fair January 17-20

The Alberta Provincial Seed Fair will be held in Calgary from January 17 to 20, at the same time as the U.F.A. annual convention, announces Field Crops Commissioner W. J. Stephen. The first two days will be occupied by the judging of entries and a number of meetings will be held during the last two days. The Alberta Seed Growers' Association will hold their annual meeting at the same time. Entries are expected at the seed fair from a number of exhibitors in the province who are showing at the forthcoming Chicago International Hay and Grain Show.

## Annual U.F.A. Convention

The 1928 annual convention of the United Farmers of Alberta will be held from January 17 to 20, it is announced from the offices of the U.F.A. in Calgary. It is likely that Calgary will be selected as the meeting place, last year's convention having met in Edmonton. Resolutions to be submitted to the convention are already coming in to the U.F.A. office and a busy four days' program is anticipated.

## School Lands Bring High Prices

High prices have been realized for parcels of school lands sold by auction in various districts in the province during the past week. One quarter section at the Vegreville sale established the high mark of \$73 per acre, and an average price of about \$40 per acre is reported for the 219 quarters offered.

Prompt Service and prices reasonable  
**M. L. CHAPMAN**  
Chinook, Alta.

Mrs. Clarkson and daughter, who have been visiting in the district for some time, left Sunday for their home near Kludersley.

Mr. and Mrs. H. Barnes, of Calgary, who have been visiting the latter's brother, Mr. G. Christopherson, south of Chinook, for a short time returned to their home in Calgary Friday.

The Card Club met Tuesday evening at the home of Mrs. Steckle. Mrs. Rennie was the winner of the prize, a lovely cream and sugar set. The Club meets next week at the home of Mrs. Dawson.

Messrs J. P. Watson, Chinook, and N. D. Stewart, Coliholme, left Wednesday morning for Calgary, where they will attend the annual meeting of the Alberta Wheat Pool, as delegates from District D., North Calgary.

The evangelistic services which have been conducted by the Rev. Harry Humble, of Calgary, in the United Church for the past ten days, came to a close last night. Mr. Humble is a fluent speaker and those who failed to hear him during his visit here missed a real treat.
